Fire Suppression

BD Enterprises has a complete line of fire protection system for any kind of enterprise. With our safety at work approach we help you to analyze your operation and determine the correct fire suppression system for your business. Our range includes...

- Fire hydrant systems
- Automatic sprinkler systems

Fire Detection Systems

In today's complex industrial environments, the potential for down time and financial losses caused by overheat and fire can be disastrous if not detected and located quickly. Accurate and efficient flame and heat detection is therefore vital to your business.

Conventional & Analogue Addressable Fire Panels

We are in alliance with *Apolo & System Sensor* approved by LPCB for wide range of microprocessor based conventional fire panels and detectors. We also ourselves manufacture conventional type microcontroller based fire panels to fit the budget of various clients. In addressable we also procure panels and detectors from *Notifier* and commissioning the same as per the requirement of the client.

Access Control & Time Attendance with Payroll Integration

Access Control & Time Attendance with Payroll Integration

We are offering both simple and advanced solutions as required by a facility to regulate the movement of people into and within a building - protecting your ideas, information and property. Our solution ranges from simple Proximity Card to Biometric & RFID based smart card systems for effective supervision of employees by utilizing the latest IT technologies and integrations with HR systems. Visitor and contractor processing is also streamlined due to integration with business systems. The systems can operate in a redundant configuration ensuring a high level of reliability.

CCTV & Remote Surveillance

CCTV & Remote Surveillance

We offering full range of hi-tech CCTV, DVR and digital surveillance equipment. is a dynamic world-class supplier of remote visual CCTV systems with extensive application in various industries providing highly reliable, digital closed circuit television surveillance systems. Software-based digital surveillance and video management solution lets you view and control any camera from anywhere in your enterprise. It uses industry-standard communications technology and off-the-shelf hardware, and even works with your existing analog infrastructure. Powerful search capabilities support quick retrieval of specified recorded incidents. Integration with security systems allows viewing of alarms after the incident for effective investigations.
